## KIT develops novel method for faster electrode production

Researchers at the Karlsruhe Institute of Technology (KIT) have developed and successfully applied an innovative concept for the simultaneous coating and drying of two-layer electrodes. This should significantly accelerate battery production.

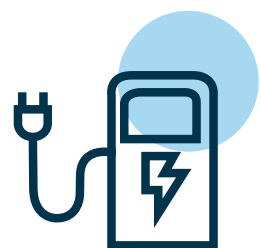

The process developed in the Thin Film Technology (TFT) research group could reduce drying times to less than 20 seconds, KIT said.

## Wales launches 'EV Charging Action Plan'

The Welsh government has launched a new e-mobility strategy and presented the 'EV Charging Action Plan'.

It envisions infrastructure investments, including the private sector, to install charging points every 20 miles at trunks crisscrossing Wales by 2025.

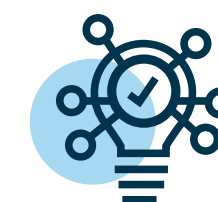

## #Lucid

[Lucid Motors](#) will begin deliveries of its debut Air model at an event in California on 30 October. The first reservation holders of the 'Dream Edition' of the Lucid Air have been invited to take delivery of their vehicles there.

## #numbers
